PERSONAL STATEMENT

I am a skilled and dedicated web developer with expertise in front-end development. I have a passion for creating high-quality, user-friendly websites and web applications using HTML, CSS, JavaScript, and frameworks such as React. I am a fast learner and enjoy finding innovative solutions to complex challenges. I have excellent communication skills and work collaboratively with colleagues and clients to ensure projects are delivered to their satisfaction.

EDUCATION

Osyp Makovey Yavoriv Gymnasium of the Yavoriv City Council of the Lviv Region

Middle school
sept 2011 – jn 2021

Osyp Makovey Yavoriv Gymnasium of the Yavoriv City Council of the Lviv Region

High School, Enhanced study of algebra and the beginnings of analysis, geometry
sept 2021 – jn 2023

Lviv Polytechnic National University

Computer science bachelor degree
sept 2023 – this days

COURSES AND TRAININGS

Creator IT Academy

Web development (HTML/CSS/JS)
feb 2021 – jn 2023

GoIT Academy

Participated at HTML, CSS & JavaScript Pre-Course
aug 2020

GoIT Academy

Completed English HTML training
aug 2020

PROJECT CASES

Group Alliance - trips abroad

The Group Alliance Travel Tickets Platform tackles the client's challenge of managing seat reservations on their six buses. With people contending for seats due to unclear phone reservations, the platform aims to ensure passengers occupy pre-purchased seats without any conflicts. The primary objective is to enable the client to manage routes, book and cancel reservations, update passenger profiles, and handle refund requests conveniently from their mobile phones. The project was fully managed by me. I developed the frontend and backend parts using React.js and Node.js.

jul 2023 - aug 2023

Creative Depo - Ukrainian Patriotic Shop

During my time working on Creative Depo, I gained valuable experience working collaboratively in a team. In just one week, we migrated the existing web page from Tilda constructor to React. As a Ukrainian patriotic clothing and accessories shop, the focus was on creating visually appealing and engaging sliders throughout the site. As part of the team, my role was to develop and implement all of the sliders on the site, ranging from the main page to the ones featured below. Throughout the project, I significantly improved my skills in utilizing git, working with command lines, and adhering to the scrum methodology. Additionally, I honed my skills in coding React components and using Swiper JS to create sleek and responsive sliders. Overall, working on Creative Depo was a challenging but rewarding experience that allowed me to enhance my skills as a developer and contribute to a unique and inspiring project.

Yantarne.fm (2.0 version)

For this project, I contributed creative ideas for the page design and created a prototype using Figma. I also experimented with adding elements to a local sandbox, which helped me improve my skills in Figma prototyping and working with APIs. Additionally, this project allowed me to enhance my creativity skills.

Yantarne.fm

This is the project that I am participating in. My role involves prototyping one of the versions of the final page. Specifically, I am using pre-existing radio player components to create the landing page for the radio. It was the first project where I take part in. Here are some skills that I have improved:

- Writing HTML code
- Adding CSS styles to web pages
- Creating sliders using native JavaScript
- Designing logos using Figma
